

AquaSept™

for **HIGH SPEED HANDPIECE & AIR / WATER SYRINGE**

AquaSept™ is the only fully autoclavable sterile irrigation system on the market. AquaSept™ seamlessly integrates with most dental units, providing superior patient care. The AquaSept™ system for High Speed Handpiece and Air / Water Syringe is a valuable addition to any dental office, decreasing procedure times while increasing patient volume and value.

Simplify Sterile Irrigation with AquaSept

CONVENIENT

Easily install AquaSept™ on virtually any dental unit. Retrofit your high speed handpiece for surgical procedures and add a sterile syringe to your set-up, eliminating the need for hand irrigation. AquaSept™ is always available on the dental unit, ensuring sterile irrigation is accessible and convenient for any procedure.

VALUABLE

The AquaSept™ system is a valuable addition to any dental office. Set-up and tear down times are fast, boosting productivity and increasing the bottom line. AquaSept™ is designed to be autoclaved between uses, including the waterlines, thereby preventing biofilm buildup, disease transmission and patient cross-contamination. No other system provides as much value.

UNIQUE

The unique and proprietary design of the AquaSept™ system allows for easy irrigation control on the handpiece and no footprint. The AquaSept™ system eliminates the need for additional staff for hand lavage, water treatment systems and reduces waste. Nothing performs better.
